Report – Report can be typed or hand written for up to two pages.

Communicate to Impress :

- Communication is an act of sending information from one person to another.
- Barriers involved in communication are Physical, Cultural, Gender, Psychological, Language, Perceptual.
- Verbal communication is involved by direct speaking, writing or through phone calls.
- Non-verbal communication involves Facial expression, Paralanguage, Gestures, Posture, Eye-contact, Appearance.

Deliver Presentations with Impact :

- Do the presentation with few slides.
- Use a single word or sentence and then elaborate as your present.
- Jargon and Slang should be avoided.
- Abbreviated words. Should be used only after using the full form for first time.
- Use templates matching the need of the topic/subject.
- Images speak louder than words.
- Background to be simple.
- The language used should be simple and understand by all.
- End with a thank you slide, so that audience is aware that it is the end of session.

Develop Soft Skills for the Workplace :

- Soft skills are people skills that are difficult to quantify and measure.
- Soft skills are Communication skills, Time Management, Self confidence, Business Etiquette, Goal setting, Team work.
- These skills helps to maintain healthy relationship.

Soft skills are acquired by improving the personality traits and learning new skills required.

Section 1 - Introduction

1

Introduction to course

Video - 01:58 mins

Report – Report can be typed or hand written for up to two pages.

- Introduction to python and its origin.
- Procedure to install python in mac and windows.
- Python is the easiest programming language because user need not think about the syntax and it is simple.
- Usage of variables and constants.
- Operations on numbers based on precedence rule.
- Python is a dynamically typed language. It doesn't know about the type of the variable until the code is run.
- Casting is used to convert a variable value from one type to another.
- String datatype is assigned to a variable by representing data with single or double quotes.
- A list is a data structure in Python that is a mutable, or changeable, ordered sequence of elements.
- A tuple is an immutable sequence of Python objects. Tuples are sequences, just like lists.
- The differences between tuples and lists are, the tuples cannot be changed unlike lists and tuples use parentheses, whereas lists use square brackets.
- Dictionary in Python is an unordered collection of data values, used to store data values like a map.
- Python Dictionary are defined into two elements Keys and Values. Keys will be a single element. Values can be a list or list within a list, numbers, etc.
